PROFESSIONAL SUMMARY

Motivated MCA student with an academic record. I have a CGPA of 9.15 and hands-on experience in Python. Machine Learning and AI-powered application development are my areas of expertise. I am good at building end-to-end ML pipelines. Web interfaces and computer vision solutions are also something I can do. I work well in teams. Can deliver projects quickly. I want to use my skills to solve real-world problems, in telecom and software engineering and looking for an opportunity to apply my skills in these areas.

EDUCATION

Master of Computer Applications (MCA)

2025 – Present

CMR University, Bangalore | 2nd Semester

CGPA: 9.15 / 10.0

Bachelor of Computer Applications (BCA)

2022 – 2025

Sheshadripuram Degree College, Bangalore

Percentage: 84.50%

TECHNICAL SKILLS

Programming Languages:

Python, SQL

Web Technologies:

HTML, CSS, Javascript

AI / Machine Learning:

Machine Learning, Artificial Intelligence

Data Science Libraries:

NumPy, Pandas, Matplotlib

Tools & Platforms:

GitHub, VS Code, IBM SkillBuild, Google Colab

Soft Skills:

Team Collaboration, Time Management, Problem Solving

PROJECTS

Disease Prediction from Doctor Notes

Python | ML | NLP

- Developed an ML model to analyze unstructured doctor notes and predict possible diseases using NLP techniques.
- Implemented text preprocessing pipelines and trained classification models achieving high accuracy on medical datasets.
- Reduced diagnosis time by automating pattern recognition in clinical text data.

YOLO Webcam Detection System

Python | OpenCV | YOLO

- Built a real-time object detection application using YOLOv5/v8 integrated with live webcam feed.
- Achieved near-real-time detection performance using optimized frame processing pipelines.
- Applied computer vision techniques for multi-object identification and bounding box visualization.

Online Quiz System

Python | HTML | CSS | SQL

- Designed and developed a full-stack web-based quiz platform with dynamic question management and scoring.
- Implemented secure database operations for user management, quiz history, and results tracking using SQL.

Sketch Master Pro

Python | Image Processing

- Created an image-to-sketch converter application using Python and OpenCV image processing techniques.
- Implemented multiple artistic filters and edge-detection algorithms for varied sketch output styles.

INTERSHIPS & TRAINING

Frontend Web Development Internship

S Spiders-2025

- Developed responsive web interfaces using HTML5 and CSS3, gained hands-on experience in modern web design principles.

AI & Machine Learning Virtual Internship

IBM Skill Build-2026

- Completed an intensive AI/ML internship covering supervised learning, neural networks, and model deployment workflows.
- Built and evaluated ML models on real datasets as part of IBM's structured learning programme.

CERTIFICATIONS

- The Joy with Python Computing – NPTEL Certification
- Introduction to Cyber Security – Cisco Networking Academy
- Artificial Intelligence – IBM Skill Build Certification

ACHIEVEMENTS & ACTIVITIES

- I took part in the Model Context Protocol Workshop with NxtWave.
- I attend to an AI Workshop, by CMR University. They had hands-on sessions where we got to use AI and ML tools.
- I kept my CGPA really high at 9.15 in my MCA. I worked hard to do well. My grades showed it.
