

DHANUSH G

MCA Student | AI/ML Engineer | Full-Stack Developer

Bangalore, India | +91 7676210494 | dhanushdhanud54@gmail.com

LinkedIn: linkedin.com/in/dhanush-g-46b54b299 | GitHub: github.com/Dhanush-ux177

PROFESSIONAL SUMMARY

Motivated MCA student (CGPA 9.15) with proven expertise in Python, Machine Learning, and AI/ML application development. Hands-on experience building end-to-end ML pipelines, computer vision solutions, and full-stack web applications. Seeking Full-Stack Software Engineer role to apply technical skills in real-world challenges while growing proficiency in modern JavaScript frameworks, cloud platforms, and DevOps practices.

EDUCATION

Master of Computer Applications (MCA) | CMR University, Bangalore | 2024 – Present

CGPA: 9.15/10.0 | 2nd Semester

Bachelor of Computer Applications (BCA) | Sheshadripuram Degree College, Bangalore | 2022 – 2025

Percentage: 84.50%

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS

AI/Machine Learning: Machine Learning, Artificial Intelligence, NLP, Computer Vision, PyTorch, TensorFlow

Data Science & Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV

Web Development: React.js, HTML5, CSS3, JavaScript ES6+, REST APIs

Databases & Tools: SQL, PostgreSQL, GitHub, Git, VS Code, Google Colab, Jupyter Notebook

Other: Problem Solving, Team Collaboration, Time Management, AI-Assisted Development Tools

PROJECTS & EXPERIENCE

Disease Prediction from Doctor Notes

Python | Machine Learning | NLP | Text Processing

Developed ML classification model to analyze unstructured clinical text and predict diseases using advanced NLP techniques. Implemented text preprocessing pipelines, trained multiple models on medical datasets, and achieved high accuracy in pattern recognition. Automated diagnosis pattern identification, reducing manual analysis time.

YOLO Real-Time Object Detection System

Python | YOLOv5/v8 | OpenCV | Computer Vision

Built real-time object detection application using YOLOv5/v8 with live webcam feed integration. Optimized frame processing pipelines for near-real-time detection performance. Applied computer vision techniques for multi-object identification and bounding box visualization.

Online Quiz Platform

Python | HTML5 | CSS3 | SQL | Full-Stack Web Development

Designed and developed full-stack web-based quiz platform with dynamic question management system and automated scoring. Implemented secure database operations for user authentication, quiz history tracking, and results management using SQL.

Sketch Master Pro - Image Processing Application

Python | OpenCV | Image Processing | Edge Detection

Created image-to-sketch converter application using Python and OpenCV. Implemented multiple artistic filters and edge-detection algorithms to produce varied sketch output styles.

INTERNSHIPS & TRAINING

Frontend Web Development Internship | S Spiders | 2025

Developed responsive web interfaces using HTML5 and CSS3. Gained hands-on experience with modern web design principles, responsive layouts, and user interface best practices.

AI & Machine Learning Virtual Internship | IBM SkillBuild | 2026

Completed intensive AI/ML program covering supervised learning, neural networks, model evaluation, and deployment workflows. Built and evaluated ML models on real-world datasets. Gained practical experience with end-to-end ML pipeline development and AI-assisted coding tools.

CERTIFICATIONS

The Joy of Python Computing (NPTEL/Academic Certification)

Introduction to Cyber Security (Cisco Networking Academy)

Artificial Intelligence (IBM SkillBuild Certification)

ACHIEVEMENTS & ACTIVITIES

AI Workshop Attendee - CMR University: Completed hands-on sessions in AI/ML tools and methodologies.

Maintained strong academic CGPA of 9.15 in MCA program, demonstrating consistent technical excellence and dedication to learning.
